

A

Same targets, different lexical neighborhoods

Illustrative target and filler words from the three instructional conditions

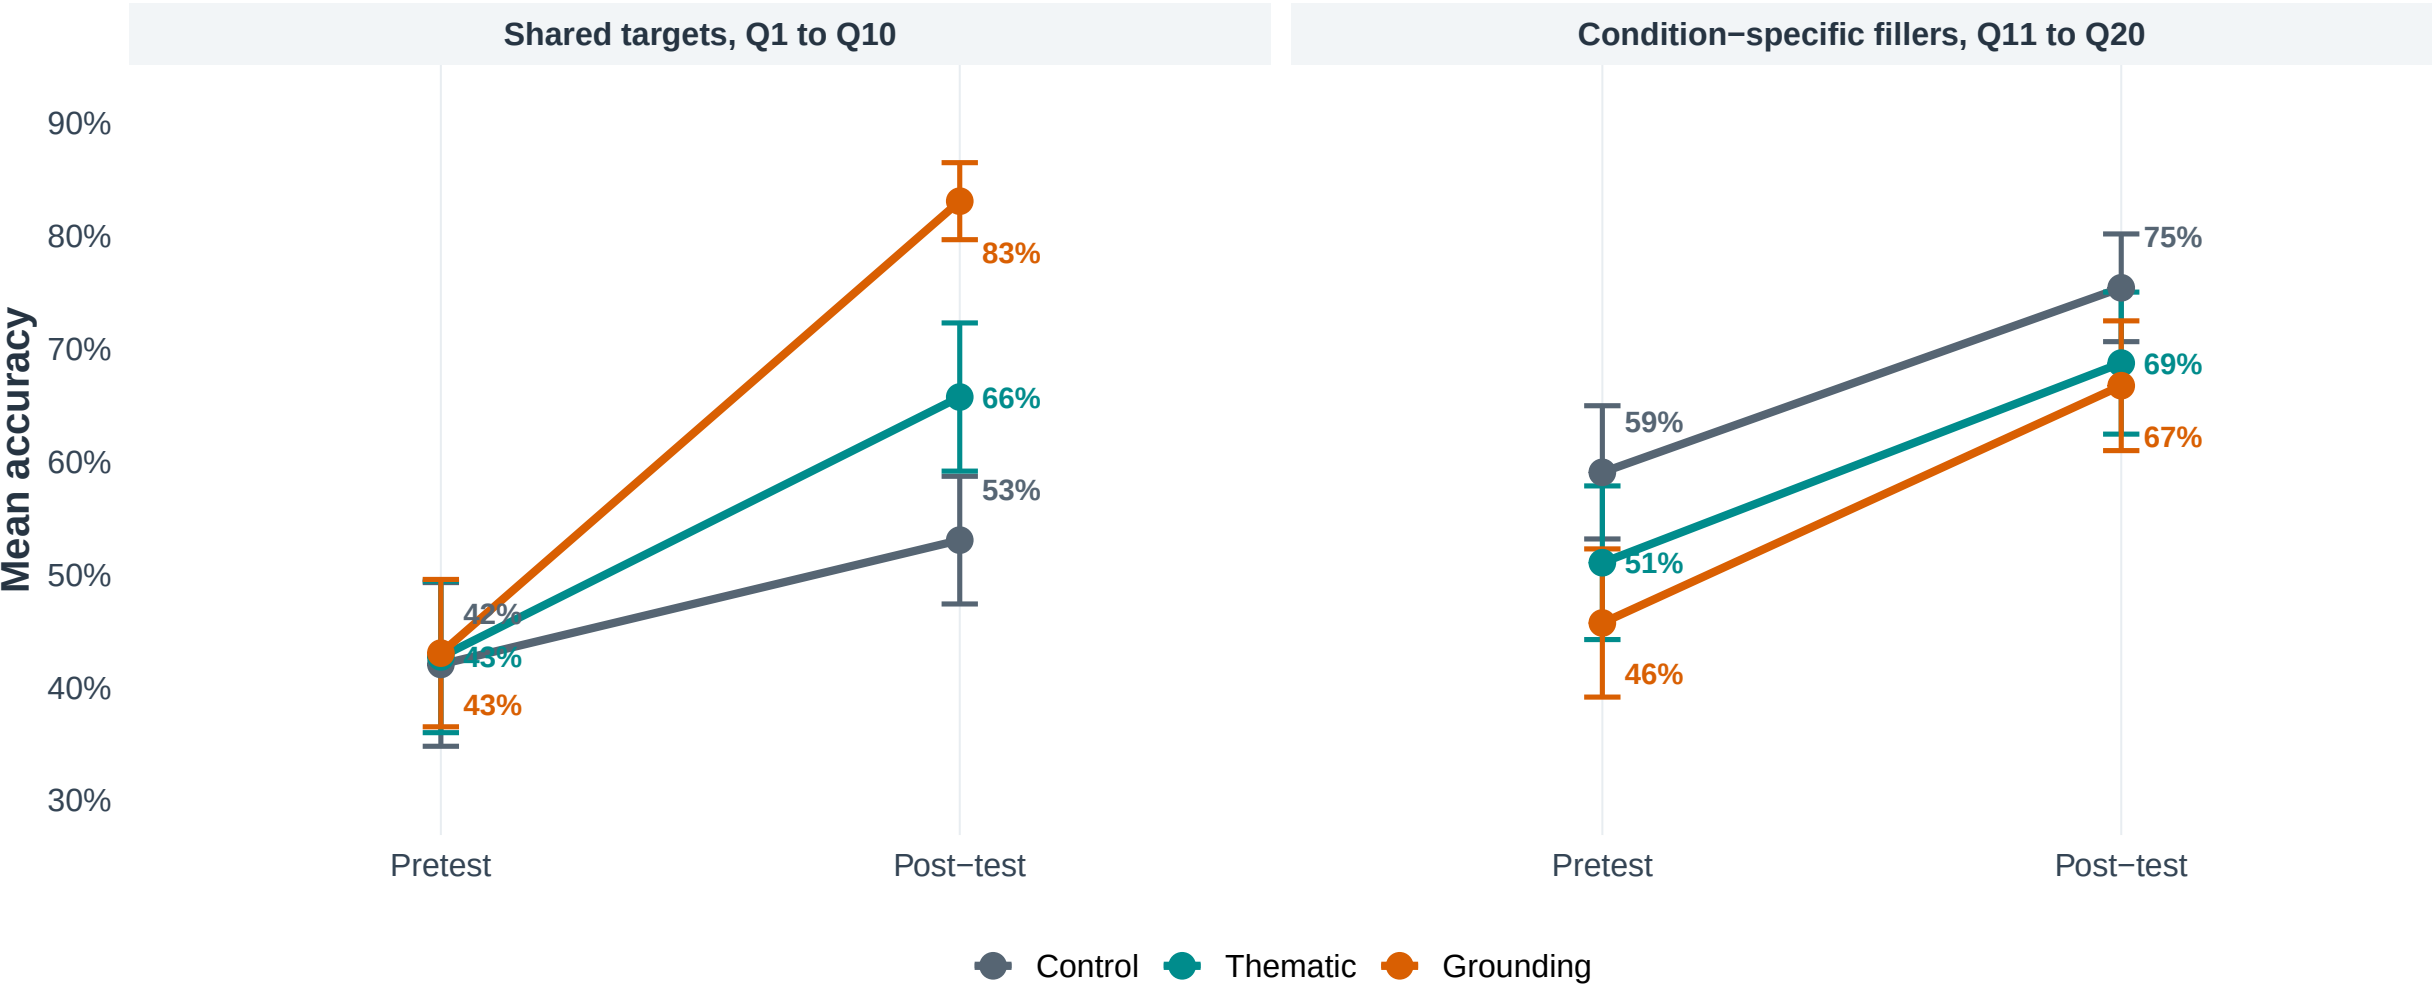

CONTROL		THEMATIC		GROUNDING	
Presented independently		Co-occur in shared contexts		Explicit lexical-semantic links	
SHARED TARGETS	FILLERS	SHARED TARGETS	FILLERS	SHARED TARGETS	FILLERS
reconsider	disappear	reconsider	prepare	reconsider	rethink
avoidable	restless	avoidable	pending	avoidable	unavoidable
uncertain	uneven	uncertain	urgent	uncertain	definite
maintain	unwrap	maintain	submit	maintain	preserve

Examples use Q1 to Q4 targets and Q11 to Q14 fillers. Dots indicate contextual co-occurrence, not word-to-word pairing.

B

Target and filler performance over time

Shared targets separate strongly by condition; filler gains are descriptive within each condition

Target items are identical across conditions. Filler items differ by condition, so the filler panel does not support a between-condition comparison.
